KEY MESSAGES ON THE REDUCTION OF ADMINISTRATIVE BARRIERS IN THE CONSTRUCTION INDUSTRY OF RUSSIA AND MOSCOW

September 1-15, 2019

KEY TOPICS

Vitaly Mutko instructed the Ministry of Construction to prepare proposals to facilitate the life of developers until the end of September

Moscow authorities will transfer all urban development services online in a year

The Ministry of Construction of the Russian Federation is developing a concept for the implementation of a life management system for capital construction projects using BIM

KEY SPEAKERS

Maxim ORESHKIN

Minister of Economic Development of the Russian Federation

“The investment climate is now the most important reform that the government is engaged in; this is all we do to reduce administrative barriers. We need to work to support investment and infrastructure, especially at the regional level”

Vladimir EFIMOV

Deputy Mayor of Moscow for Economic Policy and Property and Land Relations

“Within six months of the year we will transfer 100% to an electronic form of service, primarily in the field of urban planning and land relations. As part of the work to improve the investment climate in Moscow, the deadlines for completing work on connecting to electric networks, water supply and heating networks were reduced by five times”

Artem ZASURSKY

Vice President on strategy, AFK Sistema

“During the conference “Foreign investment in Russian business. Risks and Opportunities” it was said that Russia is rising in the Doing Business ranking. We are already in 31st place. In Europe, many countries are below us, a good achievement”

Eduard LYSENKO

Head of Moscow Department of Information Technology

“The digitalization of the construction industry began a few years ago. Gradually, we transferred key services of the construction industry to electronic form. For example, at mos.ru, you can obtain permission to build or commission an object, submit documents for a state examination, and much more. We are moving towards the creation of a single digital platform in the field of construction. It will allow combining all the information systems and services of the Stroykompleks so that market participants can receive services even faster”

Anton MOROZ

Vice President NOSTROY

“Separate topics in the development of the construction industry are the transition to new digital construction management systems, design in the BIM-technology system, and the transfer of public services in the construction sector to an electronic interaction model. We are actively working in this direction. In particular, the focus on digitalization is given in the Strategy for the Development of the Construction Industry until 2030, developed by the Ministry of Construction of the Russian Federation”

Vitaly KRESTIANCHIK

Head of the BIM department of the Pride creative production association

“With the help of BIM we were able to unite all areas of design, the main of which are architecture, construct, engineering systems and general plan. Modern modeling has simplified the system of interaction with city structures and with the customer: you could always get any information and even virtually walk around the object”
