KEY MESSAGES ON THE REDUCTION OF ADMINISTRATIVE BARRIERS IN THE CONSTRUCTION INDUSTRY OF RUSSIA AND MOSCOW

August 16-31, 2019

KEY TOPICS

Inform about the beginning and end of the construction of individual housing construction is available in electronic form in Moscow

BIM Implementation Working Group established in Moscow

The General Plan Institute of Moscow has developed a base of standard elements for BIM

KEY SPEAKERS

Vitaly MUTKO

Deputy Prime Minister of the Russian Federation for Construction and Regional Development

“It is necessary to improve regulatory regulation and technologies, work out the situation with the development of the pricing system in construction, streamline procedures, including calls for re-examination, and introduce the institution of expert support of projects. We expect that gradually this format will be used not only at the construction stage, but also in the early stages of the project creation”

Marat KHUSNULLIN

Deputy Mayor of Moscow for Urban Planning and Construction

“We made an amendment to the Federal Urban Planning Code, according to which Moscow, with the introduction of BIM technologies, has the right to establish its legislative acts. During 2019–2020, we will switch to the use of BIM technologies in many areas, including at the stage of project appraisal”

Alexander ZAITSEV

Executive Director of the Institute of Urban Planning and System Design

“BIM is increasingly being used in design. Information modeling gives a clear and comprehensive idea of the design and construction of an object, in contrast to two-dimensional drawings. BIM involves the automation of many calculations and processes, which greatly simplifies the work of the designer and reduces the number of errors”

KEY PUBLICATIONS

RIA NOVOSTI

August 20, 2019

The City Property Department entered into an agreement with the Rosreestr office for Moscow, the Center for Property Payments and Housing Insurance and the Moscow Cadastral Chamber, according to which information on newly registered or changed characteristics of Moscow real estate objects that have passed cadastral valuation will be sent to the Rosreestr for electronic registration in the Unified State Register

MOSKOVSKAYA PERSPEKTIVA

August 27, 2019

The working group on the implementation of information modeling technologies in construction was created by the Moscow construction complex.

STROITELNAYA GAZETA

August 28, 2019

The Institute of the General Plan of Moscow has developed a database of typical buildings and city elements according to various reference books, so that they can easily be included in any planning project for the BIM model.

Marat KHUSNULLIN

Deputy Mayor of Moscow in the Government of Moscow on urban planning and construction

“We made an amendment to the Federal Urban Planning Code, according to which Moscow, with the introduction of BIM technologies, has the right to establish its legislative acts. During 2019–2020, we will switch to the use of BIM technologies in many areas, including at the stage of project appraisal”

Sergey LEVKIN

Head of the Moscow Urban Planning Policy Department

“Changes made to the Town Planning Code in June this year introduced concepts such as an information model, the formation and maintenance of a building information classifier, digital architecture, and the life cycle management of an object. These short stories provide an opportunity to begin the active introduction of information modeling technology”

Valery LEONOV

Chairman of Moskomekspertiza

“Optimization of the process of filing applications in electronic form can significantly accelerate the process of obtaining services. Due to the possibility of passing an examination using the Mos.ru portal, you can significantly reduce the waiting time from submitting an application to issuing a finished opinion, as well as track all the stages of approval online. At the same time, the very mechanism of providing public services becomes more transparent and helps reduce administrative barriers ”

Oleg GRIGORIEV

First Deputy Director for Production Issues of the General Plan Institute

“At our institute, a department for the implementation of BIM technologies was created in which all employees undergo training in the process of performing a specific task. Specialists have developed a database of typical buildings and urban elements according to various reference books, so that they can easily be included in any planning project. This significantly speeds up the work and simplifies the task of developing a model”

Arsenty SIDOROV

General Director of STC Etalon LLC

“Our holding began to test BIM-technology in 2012. At first, we used them only in design, and as the model of technology developed, they came with us to the site itself. The information model allows companies to calculate the future scenario of construction, calculate the cost and terms, workload of specialists, analyze the progress of work, minimize costs”
