KEY MESSAGES ON THE REDUCTION OF ADMINISTRATIVE BARRIERS
IN THE CONSTRUCTION INDUSTRY OF RUSSIA AND MOSCOW

MARCH 16-31, 2020

KEY TOPICS

Ministry is elaborating a super service for digital construction.

Moskomstroyinvest developed recommendations on reports completion for developers.

Federal Cadaster Chamber and Rosreestr launches a new online service "Public cadaster map".

KEY PUBLICATIONS

STROITELNAYA GAZETA

March 18, 2020

RF government will prepare additional program for the national project "housing and urban environment" by the end of spring.

INTERFAX

March 20, 2020

Public talks on urban projects in Moscow will be launched in electronic format on March 20.

STROITELNAYA GAZETA

March 25, 2020

Marat Khusnullin announced that measures on developers support during the coronavirus epidemic and economic recession would be considered immediately after receipt.

KEY SPEAKERS

Marat KHUSNULLIN

Deputy Prime Minister of Russia

"Due to the economic situation we have considered how to implement the project "Housing and urban environment". We have made a decision to prepare a special program which will take into account all measures. We understand what measure we should take not to lose achieved impetus on housing commissioning"

Sergey LEVKIN

Head of the Moscow urban planning department

"Since transfer of services to electronic format, developers submitted in electronic format over 10 thousand applications on engineering connection to electricity, heating networks, water supply and drainage. Developers can monitor the progress of services provision, send necessary documents and obtain results in personal account"

Elena SPIRIDONOVA

Director of the Moscow Cadaster Chamber

"Electronic services is an integral part of modern life. Remote ways of cooperation with public authorities let reduce time and financial costs connected with personal requests to public authorities"

Sergey LEVKIN

Head of the Moscow urban planning department

“Since transfer of services to electronic format, developers submitted in electronic format over 10 thousand applications on engineering connection to electricity, heating networks, water supply and drainage. Developers can submit applications online, monitor the progress of services provision, send necessary documents, sign documents with an electronic signature and obtain results in personal account”

Vladimir YAKUSHEV

Minister of construction, housing and public utilities of Russia

“In 2019 Ministry of Russia conducted monitoring under which 25 regions announced launch of regional informative systems of urban planning support (ISUPS), 27 have set deadline for the launch. New rules will let introduce this system to all regions and obtain ready access to information for qualitative public and municipal online services in construction. In the nearest future complete information about development of any territory will be available on the map of Russia, which will give management bodies actual information about state of affairs in construction, and investors will correctly predict perspectives of work in any region”
